

“Grizzly” power amplifiers - proven performers for the PCS Band

- Frequency Range: 1840-1870MHz or 1930-1990MHz
- Modulation: CDMA
- “Grizzly” is available as a SCPA, or as an MCPA, with 30 or 35 W of power

This is one of the most popular and successful products we have ever built. Technologically advanced, this unit is designed with the latest RF transistors and components which significantly improve network performance. “Grizzly” products achieve high efficiency and deliver field proven reliability. They have been installed and are operating in wireless networks on several continents.

“Grizzly” 1930-1990Mhz 35W version shown here.
